ashima

GETTING STARTED GUIDE

A quick guide to help you make the most of the core features of Ashima

AGSG V1.2/MAY 2017

Thank you for choosing to use Ashima. To ensure you get the maximum benefit from Ashima, we strongly advise that you read through this guide to familiarise yourself with all of the features available.

Ashima is an online payroll system that allows you to easily manage day to day payroll responsibilities including timesheets, shift planning, earnings, deductions and contributions including leave management and sending online payslips. Aimed at medium to small sized businesses and start ups, as well as accountancy professionals wishing to run multiple payrolls, Ashima Payroll has been designed with the your business in mind.

We are always happy to hear from you with regard to suggestions for new features or ideas to improve how the system currently works. If you have any comments to make please let us know at suppport@ashima.ph

INTRODUCTION

Switching to Ashima. We make it easy

The purpose of a Get Started Guide is to outline the recommended approach to be undertaken during implementation, including the information you will need to complete the setup process, the proposed timeline and the roles and responsibilities.

During the early stage of the project, you will make decisions on how you want and need Ashima to be configured to meet your business and possibly legislative requirements. This includes setting up payroll items that make up the employee's pay, such as wages, allowancs, entitlements, deductions, benefits and taxes.

This set up guide will walk you through the process to get your Ashima raccount ready for live operation

PROJECT LEAD

At this early stage of the implementation, the activities are typically performed by your designated Project Lead, ideally someone with a broad knowledge of your organization. The ideal project leads have full understanding of your current payroll calculation and process requirements, are able to quickly interpret problems and facilitate resolution with your internal subject-matter-experts. This individual has full responsibility for the Ashima payroll implementation process and works closely with the Ashima support team during the set up phase.

The Project Lead drives process consistency and effectiveness, as well as ensures timely decision making related to the process. The Project Lead should be someone with the authority and ability to make business decisions along the way in order to keep the process moving. A failure to progress on the project is guaranteed to lengthen the implementation time and make the whole process inefficient.

Responsibilities:

- Defines project delivery schedule
- Manages adherence to project schedule
- Determines and communicates issues, interdependencies, decisions, and schedule changes to executives
- Validates assumptions and requirements
- Reviews the details of each configuration/settings
- Translates existing data and formats the data for Ashima migration
- Helps execute during parallel testing phase
- Approve successful and compliant payroll

TIMELINE

Set up, migration, and training to allow end-users to get up to speed takes a minimum of 5 weeks and up to 8 weeks to implement appropriately. Key players in the organization have to use Ashima every day to fully understand how the different modules roll into each other. Parallel testing can take a month on top of that.

The following is a typical 10 week implementation timeline.

Collect & Organize Data for Setup

This includes your business details, earnings, deductions and other payrol information

WEEK 01

Set Up Ashima

Login to your Admin Account to configure Ashima to suit your business & payroll requirements

WEEK 02

Migrate Data

Onboad employees, upload 201 files prior payroll data, leave balances, etc.

WEEK 03-04

Enable Employee Self Service

Enable access to their ESS portal to view their timesheets, shifts, leave balances & pay slips

WEEK 05

Training & Testing

Onsite or remote training to get the most out of your Ashima experience.

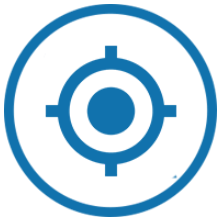

WEEK 05

Run Parallel Payroll

Run two parallel testing cycles for consecutive pay periods. Compare outputs and manage discrepancies

WEEK 06-09

Go Live

End users accepts that Ashima is fit-for-purpose and ready for live operation

WEEK 10

WEEK
01

Setup Checklist: collect these things befort you start

Before you can use Ashima for your day-to-day transactions, you'll need to complete the Setup Guide to configure Ashima to fit your business polices and requirements. If you're coming from an existing payroll system or if you are using manual payroll processing, collect this information now so you can enter it during setup rather than fixing things later. Your payroll in Ashima might not be accurate if you dont bring accross the right data.

This section lists key information you should collect before you start.
